THE REPLY FILED 17 October 2005 FAILS TO PLACE THIS A		•	
1.  The reply was filed after a final rejection, but prior to or or this application, applicant must timely file one of the follow places the application in condition for allowance; (2) a Not a Request for Continued Examination (RCE) in compliant time periods:	wing replies: (1) an amendment, aff ptice of Appeal (with appeal fee) in o ce with 37 CFR 1.114. The reply mo	idavit, or other evider compliance with 37 C	nce, which FR 41.31; or (3)
a) The period for reply expiresmonths from the mailing b) The period for reply expires on: (1) the mailing date of this A no event, however, will the statutory period for reply expire I Examiner Note: If box 1 is checked, check either box (a) or TWO MONTHS OF THE FINAL REJECTION. See MPEP 7 Extensions of time may be obtained under 37 CFR 1.136(a). The date	Advisory Action, or (2) the date set forth ater than SIX MONTHS from the mailing (b). ONLY CHECK BOX (b) WHEN THE 06.07(f).  on which the petition under 37 CFR 1.1	g date of the final rejecti E FIRST REPLY WAS F 136(a) and the appropria	on. ILED WITHIN Ite extension fee
have been filed is the date for purposes of determining the period of ex under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the set forth in (b) above, if checked. Any reply received by the Office later may reduce any earned patent term adjustment. See 37 CFR 1.704(b) NOTICE OF APPEAL	tension and the corresponding amount shortened statutory period for reply origing than three months after the mailing dangle.	of the fee. The appropr inally set in the final Offi te of the final rejection,	iate extension fee ce action; or (2) as even if timely filed,
<ol> <li>The Notice of Appeal was filed on A brief in comp filing the Notice of Appeal (37 CFR 41.37(a)), or any exte a Notice of Appeal has been filed, any reply must be filed AMENDMENTS</li> </ol>	nsion thereof (37 CFR 41.37(e)), to	avoid dismissal of th	ns of the date of se appeal. Since
<ol> <li>The proposed amendment(s) filed after a final rejection,</li> <li>(a) They raise new issues that would require further co</li> <li>(b) They raise the issue of new matter (see NOTE belo</li> <li>(c) They are not deemed to place the application in belappeal; and/or</li> </ol>	nsideration and/or search (see NO w); tter form for appeal by materially re	TE below); ducing or simplifying	
(d) They present additional claims without canceling a NOTE: (See 37 CFR 1.116 and 41.33(a)).			
<ul> <li>4.  The amendments are not in compliance with 37 CFR 1.1</li> <li>5.  Applicant's reply has overcome the following rejection(s)</li> </ul>		mpliant Amendment	(PTOL-324).
<ul> <li>5. Applicant's reply has overcome the following rejection(s)</li> <li>6. Newly proposed or amended claim(s) would be all non-allowable claim(s).</li> </ul>		timely filed amendme	ent canceling the
7. For purposes of appeal, the proposed amendment(s): a) how the new or amended claims would be rejected is protected. The status of the claim(s) is (or will be) as follows:  Claim(s) allowed:  Claim(s) objected to:  Claim(s) rejected:  Claim(s) withdrawn from consideration:	☐ will not be entered, or b) ☐ wil vided below or appended.	ll be entered and an e	explanation of
AFFIDAVIT OR OTHER EVIDENCE			
<ol> <li>The affidavit or other evidence filed after a final action, but because applicant failed to provide a showing of good an was not earlier presented. See 37 CFR 1.116(e).</li> </ol>	d sufficient reasons why the affiday	it or other evidence is	s necessary and
9. The affidavit or other evidence filed after the date of filing entered because the affidavit or other evidence failed to c showing a good and sufficient reasons why it is necessar	overcome <u>all</u> rejections under appea y and was not earlier presented. S	al and/or appellant fa ee 37 CFR 41.33(d)(	ils to provide a 1).
10. ☐ The affidavit or other evidence is entered. An explanatio REQUEST FOR RECONSIDERATION/OTHER		•	
11. The request for reconsideration has been considered by See Continuation Sheet.	it does NOT place the application in	n condition for allowa	nce because:

13. Other: \_\_\_\_.

12. Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s).

Continuation of 11. does NOT place the application in condition for allowance because: First of all, the applicant argued that Bohorquez does not teach or suggest that the signal at positive input of element 16 in FIG. 3 is an offsest voltage. The examiner does not agree with the above assertion. As based on the definition that "offset" is "something that serves to counterbalance or to compensate for something else" (Merrian-Webster's Collegiate Dictionary, Tenth Edition, page 805), any electrical signal, either discrete or continuous, digital or analog, unipolar or bipolar, that has a voltage value and being used as an input to adjust "something" in order to compensate for "something else" is considered as "an offset voltage". In this case, Bohorquez' control signal, the signal at positive input of element 16 in FIG. 3, inherently has a voltage value and is used as the input of the level shifting circuit 16 to adjust the signal (something) applied to the driver circuit 18, which in turn applies the adjusted voltage to the heater resistor RH (column 3, lines 60-68) in order to compensate for the energy losses in the power and return lines (something else). As a result, Bohorquez' control signal is an offset voltage by definition.

In addition, the applicant also argued that Suzuki uses the power supply to provide the driving pulse signal p, not an offset voltage. However, the main point of Suzuki's teaching is that it cures the Bohorquez's shortcoming of taking the voltage sample directly from the internal power supply path rather than for providing an offset voltage purpose.

Next, the applicant asserted that Bohorquez and Suzuki have different functions and operate in different ways. The examiner does not agree with this assertion. Both Bohorquez and Suzuki, in fact, have a common function/operation that is directly or indirectly sampling the voltage at the power supply, then adjusting the driving energy in accordance to that voltage sample.
